Dear Mr. Polek,

I left a voice mail at your desk on November 7, 2018 to let you know we are diligently working on our Areas of Concern noted in your site visitation on August 15, 2018.

I apologize as I mentioned in that voice message that I had a problem with your e-mail but realized after it was my typing error so please disregard that information.

As I mentioned in the voice mail, we are in the process of addressing all areas of concern and I just wanted to follow up as it has been sometime since the inspection and the formal letter of October 12, 2018.

It is our goal to have all of these areas addressed and back to you well before the November 27, 2018 timeline.

Meanwhile, we most recently corrected and completed some similar concerns with the City of Eureka for some illicit debris making its way to the City treatment facility. Some of the areas of concern are the same so we are well on our way to getting everything corrected.

We too appreciate your time at our facility and we look forward to getting to full compliance. As you are aware, when our new pre-treatment project is complete 100% of our processing water will run through our pre-treatment facility. We anticipate that completion by late February, well prior to the next shrimp season in April.

Thank you,

Rick Harris
